Marin navigerings- och kommunikationsutrustning – System för automatisk identifiering (AIS) – Del 2: Utrustning i klass A för fartyg – Tekniska och operationella fordringar, provningsmetoder och erforderliga provningsresultat

*Maritime navigation and radiocommunication equipment and systems –
Automatic identification systems (AIS) –
Part 2: Class A shipborne equipment of the automatic identification system (AIS) –
Operational and performance requirements, methods of test and required test results*

Som svensk standard gäller europastandarden EN IEC 61993-2:2018. Den svenska standarden innehåller den officiella engelska språkversionen av EN IEC 61993-2:2018.

Nationellt förord

Europastandarden EN IEC 61993-2:2018

består av:

- **europastandardens ikraftsättningsdokument**, utarbetat inom CENELEC
- **IEC 61993-2, Third edition, 2018 - Maritime navigation and radiocommunication equipment and systems - Automatic identification systems (AIS) - Part 2: Class A shipborne equipment of the automatic identification system (AIS) - Operational and performance requirements, methods of test and required test results**

utarbetad inom International Electrotechnical Commission, IEC.

Tidigare fastställd svensk standard SS-EN 61993-2, utgåva 2, 2013, gäller ej fr o m 2021-08-23.

Standarder underlättar utvecklingen och höjer elsäkerheten

Det finns många fördelar med att ha gemensamma tekniska regler för bl a mätning, säkerhet och provning och för utförande, skötsel och dokumentation av elprodukter och elanläggningar.

Genom att utforma sådana standarder blir säkerhetsfordringar tydliga och utvecklingskostnaderna rimliga samtidigt som marknadens acceptans för produkten eller tjänsten ökar.

Många standarder inom elområdet beskriver tekniska lösningar och metoder som åstadkommer den elsäkerhet som föreskrivs av svenska myndigheter och av EU.

SEK är Sveriges röst i standardiseringsarbetet inom elområdet

SEK Svensk Elstandard svarar för standardiseringen inom elområdet i Sverige och samordnar svensk medverkan i internationell och europeisk standardisering. SEK är en ideell organisation med frivilligt deltagande från svenska myndigheter, företag och organisationer som vill medverka till och påverka utformningen av tekniska regler inom elektrotekniken.

SEK samordnar svenska intressenters medverkan i SEKs tekniska kommittéer och stödjer svenska experters medverkan i internationella och europeiska projekt.

Stora delar av arbetet sker internationellt

Utformningen av standarder sker i allt väsentligt i internationellt och europeiskt samarbete. SEK är svensk nationalkommitté av International Electrotechnical Commission (IEC) och Comité Européen de Normalisation Electrotechnique (CENELEC).

Standardiseringsarbetet inom SEK är organiserat i referensgrupper bestående av ett antal tekniska kommittéer som speglar hur arbetet inom IEC och CENELEC är organiserat.

Arbetet i de tekniska kommittéerna är öppet för alla svenska organisationer, företag, institutioner, myndigheter och statliga verk. Den årliga avgiften för deltagandet och intäkter från försäljning finansierar SEKs standardiseringsverksamhet och medlemsavgift till IEC och CENELEC.

Var med och påverka!

Den som deltar i SEKs tekniska kommittéarbete har möjlighet att påverka framtida standarder och får tidig tillgång till information och dokumentation om utvecklingen inom sitt teknikområde. Arbetet och kontakterna med kollegor, kunder och konkurrenter kan gynnsamt påverka enskilda företags affärsutveckling och bidrar till deltagarnas egen kompetensutveckling.

Du som vill dra nytta av dessa möjligheter är välkommen att kontakta SEKs kansli för mer information.

English Version

Maritime navigation and radiocommunication equipment and systems - Automatic Identification Systems (AIS) - Part 2: Class A shipborne equipment of the automatic identification system (AIS) - Operational and performance requirements, methods of test and required test results
(IEC 61993-2:2018)

Matériels et systèmes de navigation et de radiocommunication maritimes - Systèmes d'identification automatique (AIS) Partie 2: Équipements AIS de type Classe A embarqués - Exigences d'exploitation et de fonctionnement, méthodes d'essai et résultats d'essai exigés
(IEC 61993-2:2018)

Navigations- und Funkkommunikationsgeräte und -systeme für die Seeschifffahrt - Automatische Identifikationssysteme (AIS) - Teil 2: Geräte der Klasse A des universellen automatischen Identifikationssystems (AIS) für Schiffe - Betriebs- und Leistungsanforderungen, Prüfverfahren und geforderte Prüfergebnisse
(IEC 61993-2:2018)

This European Standard was approved by CENELEC on 2018-08-23. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

The text of document 80/888/FDIS, future edition 3 of IEC 61993-2, prepared by IEC/TC 80 "Maritime navigation and radiocommunication equipment and systems" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 61993-2:2018.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2019-05-23
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2021-08-23

This document supersedes EN 61993-2:2013.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Endorsement notice

The text of the International Standard IEC 61993-2:2018 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 61097-14	NOTE	Harmonized as EN 61097-14
IEC 61108-1	NOTE	Harmonized as EN 61108-1
IEC 61108-2	NOTE	Harmonized as EN 61108-2
IEC 61162-3	NOTE	Harmonized as EN 61162-3
IEC 61924-2	NOTE	Harmonized as EN 61924-2
IEC 62287-1	NOTE	Harmonized as EN 62287-1
IEC 62320-1	NOTE	Harmonized as EN 62320-1
IEC 62320-2	NOTE	Harmonized as EN 62320-2

Annex ZA

(normative)

Normative references to international publications with their corresponding European publications

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 Where an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: www.cenelec.eu.

14.7.1	Channel selection	71
14.7.2	Transceiver protection.....	71
14.7.3	Automatic power setting	72
14.8	Alerts and indicators, fall-back arrangements.....	72
14.8.1	Loss of power supply	72
14.8.2	Monitoring of functions and integrity	72
14.8.3	Monitoring of sensor data	75
14.9	Display, input and output.....	78
14.9.1	Data input/output facilities	79
14.9.2	Initiate message transmission	79
14.9.3	Communication test	80
14.9.4	System control	80
14.9.5	Display of received targets	81
14.9.6	Display of position quality.....	82
14.9.7	Display of targets if optional filter is implemented	82
14.9.8	Display of received safety related messages.....	83

14.9.9	Presentation of navigation information	83
15	Physical tests	83
15.1	TDMA transmitter	84
15.1.1	Frequency error	84
15.1.2	Carrier power	84
15.1.3	Slotted transmission spectrum	85
15.1.4	Modulation accuracy	86
15.1.5	Transmitter output power characteristics	86
15.2	TDMA receivers	87
15.2.1	Sensitivity	87
15.2.2	Error behaviour at high input levels	88
15.2.3	Co-channel rejection	88
15.2.4	Adjacent channel selectivity	89
15.2.5	Spurious response rejection	89
15.2.6	Intermodulation response rejection and blocking	92
15.2.7	Transmit to receive switching time	93
15.2.8	Immunity to out-of-band energy	93
15.3	Conducted spurious emissions	94
15.3.1	Spurious emissions from the transmitter	94
15.3.2	Spurious emissions from the receiver	95
16	Specific tests of link layer	95
16.1	TDMA synchronisation	95
16.1.1	Synchronisation test using UTC	95
16.1.2	Synchronisation test using UTC with repeated messages	96
16.1.3	Synchronisation test without UTC, semaphore	96
16.1.4	Synchronisation test without UTC	97
16.1.5	Reception of un-synchronised messages	97
16.2	Time division (frame format)	97
16.2.1	Method of measurement	97
16.2.2	Required results	97
16.3	Synchronisation and jitter accuracy	97
16.3.1	Definition	97
16.3.2	Method of measurement	97
16.3.3	Required results	98
16.4	Data encoding (bit stuffing)	98
16.4.1	Method of measurement	98
16.4.2	Required results	98
16.5	Frame check sequence	98
16.5.1	Method of measurement	98
16.5.2	Required results	98
16.6	Slot allocation (channel access protocols)	98
16.6.1	Network entry	98
16.6.2	Autonomous scheduled transmissions (SOTDMA)	99
16.6.3	Autonomous scheduled transmissions (ITDMA)	99
16.6.4	Safety related/binary message transmission	99
16.6.5	Transmission of Message 5 (ITDMA)	100
16.6.6	Assigned operation	100
16.6.7	Group assignment	101
16.6.8	Fixed allocated transmissions (FATDMA)	104

16.6.9	Randomisation of message transmissions.....	105
16.7	Message formats.....	105
16.7.1	Received messages	105
16.7.2	Transmitted messages	105
17	Specific tests of network layer.....	106
17.1	Dual channel operation – Alternate transmissions	106
17.1.1	Method of measurement.....	106
17.1.2	Required results.....	106
17.2	Regional area designation by VDL message	106
17.2.1	Method of measurement.....	106
17.2.2	Required results.....	107
17.3	Regional area designation by serial message	107
17.4	Regional area designation with lost position.....	107
17.4.1	Method of measurement.....	107
17.4.2	Required results.....	107
17.5	Power setting	107
17.5.1	Method of measurement.....	107
17.5.2	Required results.....	108
17.6	Message priority handling.....	108
17.6.1	Method of measurement.....	108
17.6.2	Required results.....	108
17.7	Slot reuse and FATDMA reservations	108
17.7.1	Method of measurement.....	108
17.7.2	Required results.....	108
17.8	Management of received regional operating settings	109
17.8.1	Test for replacement or erasure of dated or remote regional operating settings.....	109
17.8.2	Test of correct input via presentation interface or MKD	110
17.8.3	Test of addressed telecommand	110
17.8.4	Test for invalid regional operating areas	111
17.9	Continuation of autonomous mode reporting interval	111
17.9.1	Method of test.....	111
17.9.2	Required results.....	111
18	Specific tests of transport layer	111

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – AUTOMATIC IDENTIFICATION SYSTEMS (AIS) –

Part 2: Class A shipborne equipment of the automatic identification system (AIS) – Operational and performance requirements, methods of test and required test results

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61993-2 has been prepared by IEC technical committee 80: Maritime navigation and radiocommunication equipment and systems.

This third edition cancels and replaces the second edition published in 2012. This edition constitutes a technical revision.

This edition includes the following technical changes with respect to the previous edition:

- a) it incorporates the technical characteristics included in Recommendation ITU-R M.1371-5:2014;
- b) it introduces the concept of locating device groups in order to include EPIRB AIS and MOB AIS in addition to AIS SART;
- c) it adds security features for configuration input by introducing a new sentence SSA;

- d) it adds optional implementation of IEC 61162-450/460 interfaces;
- e) it adds requirements for bridge alert management (BAM);
- f) it introduces extended dimension values used by towing vessels;
- g) it adds a software update requirement.

The text of this document is based on the following documents:

FDIS	Report on voting
80/888/FDIS	80/890/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 61993 series, published under the general title *Maritime navigation and radiocommunication equipment and systems – Automatic identification systems (AIS)*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

MARITIME NAVIGATION AND RADIOCOMMUNICATION EQUIPMENT AND SYSTEMS – AUTOMATIC IDENTIFICATION SYSTEMS (AIS) –

Part 2: Class A shipborne equipment of the automatic identification system (AIS) – Operational and performance requirements, methods of test and required test results

1 Scope

This part of IEC 61993 specifies the minimum operational and performance requirements, methods of testing and required test results conforming to performance standards adopted by IMO in Resolution MSC.74(69):1998, Annex 3. This document incorporates the applicable technical characteristics of Class A shipborne equipment included in Recommendation ITU-R M.1371 and takes into account the ITU Radio Regulations, where applicable. In addition, it takes account of IMO Resolution A.694(17) to which IEC 60945 is associated. When a requirement in this document is different from IEC 60945, the requirement of this document takes precedence.

This document also specifies the minimum requirements both for the means to input and display data and for the interfaces to other equipment suitable to be used as means of input and display data.

NOTE All text of this document that is identical to that in IMO resolution MSC.74(69):1998, Annex 3, or to that in ITU-R Recommendation M.1371 is printed in *italics*, and references to the resolution (abbreviated to "A3") or the recommendation (abbreviated to "M.1371") and paragraph numbers are indicated in parentheses, for instance (A3/3.3) or (M.1371-5/A2-3.3) respectively.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
