Elinstallationer i fartyg – Del 201: Systemuppbyggnad – Allmänt

*Electrical installations in ships –
Part 201: System design –
General*

Denna svenska standard innehåller den engelska texten i nedan angiven IEC-publikation, utarbetad inom International Electrotechnical Commission, IEC:

- **IEC 60092-201, Fifth edition, 2019 - Electrical installations in ships -
Part 201: System design - General**

Nationellt förord

Tidigare fastställd svensk standard SS-IEC 60092-201, utgåva 1, 2017, gäller ej fr o m 2021-12-15.

ICS 47.020.60

Denna standard är fastställd av SEK Svensk Elstandard, som också kan lämna upplysningar om **sakinnehållet** i standarden.

Standarder underlättar utvecklingen och höjer elsäkerheten

Det finns många fördelar med att ha gemensamma tekniska regler för bl a mätning, säkerhet och provning och för utförande, skötsel och dokumentation av elprodukter och elanläggningar.

Genom att utforma sådana standarder blir säkerhetsfordringar tydliga och utvecklingskostnaderna rimliga samtidigt som marknadens acceptans för produkten eller tjänsten ökar.

Många standarder inom elområdet beskriver tekniska lösningar och metoder som åstadkommer den elsäkerhet som föreskrivs av svenska myndigheter och av EU.

SEK är Sveriges röst i standardiseringsarbetet inom elområdet

SEK Svensk Elstandard svarar för standardiseringen inom elområdet i Sverige och samordnar svensk medverkan i internationell och europeisk standardisering. SEK är en ideell organisation med frivilligt deltagande från svenska myndigheter, företag och organisationer som vill medverka till och påverka utformningen av tekniska regler inom elektrotekniken.

SEK samordnar svenska intressenters medverkan i SEKs tekniska kommittéer och stödjer svenska experters medverkan i internationella och europeiska projekt.

Stora delar av arbetet sker internationellt

Utformningen av standarder sker i allt väsentligt i internationellt och europeiskt samarbete. SEK är svensk nationalkommitté av International Electrotechnical Commission (IEC) och Comité Européen de Normalisation Electrotechnique (CENELEC).

Standardiseringsarbetet inom SEK är organiserat i referensgrupper bestående av ett antal tekniska kommittéer som speglar hur arbetet inom IEC och CENELEC är organiserat.

Arbetet i de tekniska kommittéerna är öppet för alla svenska organisationer, företag, institutioner, myndigheter och statliga verk. Den årliga avgiften för deltagandet och intäkter från försäljning finansierar SEKs standardiseringsverksamhet och medlemsavgift till IEC och CENELEC.

Var med och påverka!

Den som deltar i SEKs tekniska kommittéarbete har möjlighet att påverka framtida standarder och får tidig tillgång till information och dokumentation om utvecklingen inom sitt teknikområde. Arbetet och kontakterna med kollegor, kunder och konkurrenter kan gynnsamt påverka enskilda företags affärsutveckling och bidrar till deltagarnas egen kompetensutveckling.

Du som vill dra nytta av dessa möjligheter är välkommen att kontakta SEKs kansli för mer information.

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	8
3.1 General.....	8
3.2 Distribution system	10
3.3 DC systems of distribution	11
3.4 AC systems of distribution.....	11
3.5 Sources of electrical power	12
4 Safety aspects.....	12
4.1 General.....	12
4.2 Degrees of protection.....	13
5 System design	14
5.1 General.....	14
5.2 System study and calculations	15
5.2.1 General	15
5.2.2 Electrical load study	15
5.2.3 Short-circuit calculations.....	15
5.2.4 Protection and discrimination study	15
5.2.5 Load flow calculations	16
5.2.6 Harmonic currents and voltage calculations	16
5.3 Documentation.....	16
5.3.1 General	16
5.3.2 Apparatus description	16
5.3.3 Principle single line diagram electrical power system.....	17
5.3.4 Overview diagram.....	17
5.3.5 List of protection and fault discrimination settings	17
5.3.6 Circuit diagrams	17
5.3.7 FAT, HAT and SAT reports	17
6 Distribution systems	17
6.1 General.....	17
6.2 DC distribution systems	18
6.2.1 Types of distribution systems.....	18
6.2.2 TN-S DC systems	19
6.2.3 IT DC systems	20
6.2.4 DC voltages.....	20
6.3 AC distribution systems	21
6.3.1 Primary AC distribution systems	21
6.3.2 Secondary AC distribution systems.....	22
6.3.3 AC voltages and frequencies	22
6.3.4 Control voltage	24
7 System earthing	24
7.1 General.....	24
7.2 Neutral earthing methods.....	25
7.3 Generators and/or main distribution transformers operated in parallel.....	25

7.4	Earthing resistors, connection to hull/structure.....	26
8	Sources of electrical power.....	27
8.1	Sources of electrical power for auxiliary services	27
8.1.1	General	27
8.1.2	Arrangement.....	29
8.1.3	Operability	29
8.1.4	Load shedding and automatic restoration of power	30
8.2	Bus-tie breakers.....	30
8.3	Starting from a dead ship condition	31
8.4	Consequences of a busbar failure or a control system failure.....	31
8.5	Additional source of electrical power	32
8.6	Emergency source of electrical power	32
9	Distribution system requirements.....	32
9.1	General.....	32
9.2	Distribution systems for electrically powered containers or temporary loads.....	32
9.3	Methods of distribution.....	33
9.4	Balance of loads	33
9.4.1	Balance of load on three-wire DC systems.....	33
9.4.2	Balance of loads in three- or four-wire AC systems	33
9.5	Final sub-circuits.....	33
9.5.1	General	33
9.5.2	Final sub-circuits for lighting	33
9.5.3	Final sub-circuits for heating.....	34
9.5.4	Control circuits	34
9.6	Socket-outlets.....	35
9.7	Lighting circuits.....	35
9.8	Shore connections	36
9.8.1	Shore connection during docking	36
9.8.2	Shore connections during port	36
9.9	Electric and electrohydraulic steering gear.....	36
9.9.1	General	36
9.9.2	Motors	37
9.9.3	Circuit design	37
9.9.4	Controls and indications	38
9.9.5	Separation.....	39
9.9.6	Communication.....	39
9.10	Navigation lights	39
9.11	Navigation installations	39
9.12	Radio installations	39
9.13	Permanently installed bilge-pumps.....	40

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRICAL INSTALLATIONS IN SHIPS –**Part 201: System design – General****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60092-201 has been prepared by IEC technical committee 18: Electrical installations of ships and of mobile and fixed offshore units.

This fifth edition cancels and replaces the fourth edition, published in 1994. It constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) a new subclause regarding studies and calculations has been added;
- b) a new subclause regarding documentation has been added;
- c) the clause regarding distribution systems has been rewritten;
- d) a clause regarding system earthing has been added;
- e) the clause regarding sources of electrical power has been rewritten;
- f) the clause regarding distribution system requirements has been rewritten;

- g) the clause regarding cables has been deleted and transferred to IEC 60092-401;
- h) a new subclause regarding electric and electrohydraulic steering gear has been added.

NOTE IEC 60092-204, *Electrical installations in ships – Part 204: System design – Electric and electrohydraulic steering gear*, has been withdrawn.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
18/1673/FDIS	18/1674/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 60092 series, published under the general title *Electrical installations in ships*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

INTRODUCTION

IEC 60092 (all parts) forms a series of international standards for electrical installations in sea-going ships, incorporating good practice and co-ordinating as far as possible existing rules.

These standards form a code of practical interpretation and amplification of the requirements of the International Convention on Safety of Life at Sea, a guide for future regulations which may be prepared and a statement of practice for use by shipowners, shipbuilders and appropriate organizations.

ELECTRICAL INSTALLATIONS IN SHIPS –

Part 201: System design – General

1 Scope

This document is applicable to the main features of system design of electrical installations for use in ships.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60092-101, *Electrical installations in ships – Part 101: Definitions and general requirements*

IEC 60092-202, *Electrical installations in ships – Part 202: System design – Protection*

IEC 60092-401, *Electrical installations in ships – Part 401: Installation and test of completed installation*

IEC 60364-1, *Low-voltage electrical installations – Part 1: Fundamental principles, assessment of general characteristics, definitions*

IEC/IEEE 80005 (all parts), *Utility connections in port*

IMO, *International Convention for the Safety of Life at Sea (SOLAS):1974, consolidated edition 2009*
