This Harmonization Document was approved by CENELEC on 1993-09-22.
CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations
which stipulate the conditions for implementation of this Harmonization Document
on a national level.

Up-to-date lists and bibliographical references concerning national implementation
may be obtained on application to the Central Secretariat or to any CENELEC member.

This Harmonization Document exists in three official versions (English, French,
German).

CENELEC members are the national electrotechnical committees of Austria, Belgium,
Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg,
Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This Part 3 of HD 428 was prepared by WG 3 of Technical Committee CENELEC TC 14, Power transformers.

The document was submitted to the Unique Acceptance Procedure (UAP) and was approved by CENELEC as HD 428.3 S1 on 1993-09-22.

The following dates were fixed:

- latest date of announcement of the HD at national level (doa) 1994-03-01
- latest date of publication of a harmonized national standard (dop) 1994-09-01
- latest date of withdrawal of conflicting national standards (dow) 1994-09-01

1 General

1.1 *Scope*

This Harmonization Document covers transformers from 50 to 2 500 kVA intended for operation in three-phase distribution networks, for indoor or outdoor continuous service, 50 Hz, immersed in mineral-oil, natural cooling, with two windings:

- a primary (high-voltage) winding with a highest voltage for equipment equal to 36 kV;
- a secondary (low-voltage) winding with a highest voltage for equipment not exceeding 1,1 kV.

NOTE 1: This document may be applied, either as a whole or in part, to transformers immersed in a synthetic insulating liquid.

NOTE 2: This document may be applied, either as a whole or in part, to transformers having windings with more than one rated voltage. In this case the rated power for each rated voltage shall be specified by the purchaser.

1.2 *Object*

The object of this document is to lay down requirements related to electrical characteristics, dimensions and design. Other requirements may be specified in a national standard.

1.3 *Compliance with current Harmonization Documents*

Transformers shall be in accordance with Harmonization Documents of the HD 398 series.

Unless herein otherwise indicated the requirements specified in HD 428.1 S1 apply also to this document.
